Fourth Week—The Greatest Thing in the World

LOVE AS THE DIVINE REFLECTION

Saturday, March 6—Love three [illegible] perfect [illegible] is your Father which is in [illegible] is perfect. Matthew 5:48.

The fifth chapter of Matthew which gives us pictures of Christ's [illegible] at work in the world asks much of us. We are not prepared to say that it asks too much. But when we reach the last verse of the chapter with its counsel of perfection we despair. For be it [illegible] Not that [illegible] morally mechanical our [illegible] powers.

It is [illegible] how much he would [illegible] words. The verse in question do not tell us that we are to be as good as God is Good nor would it not a quantity which can be weighed and measured.

What the verse does say [illegible] is perfect in the way in which God is perfect. He good not [illegible] is good after His manner. The words are [illegible] high words but they do not ask [illegible] impossibilities. Cosmic [illegible] since Christ was in many less [illegible] the unremembered acts of kindness and love are living up to and living out this command. The Christian counsel of perfection is not therefore a counsel of moral despair.

Longer [illegible] and righteous [illegible] whose goodness is manifest to us without [illegible] and [illegible] but does [illegible] helps us to understand more fully the manner of [illegible] perfection that the leadings of thy love first [illegible] in our natural affections may also be known in our souls as the grace of Christ. Amen.

Youth 8 Feet and Half Tall Is Still Growing

Robert Wadlow

With younger brother

By MAURICE MERRYFIELD
International News Writer

ALTON Ill March 6—Almost simultaneous with his nineteenth birthday on Feb 22 there was issued a lengthy report by the Journal of the American Medical association on Robert Wadlow whose phenomenal growth and size have aroused medical science

Despite the fact that he is today eight feet six inches tall and weighs 485 pounds this extraordinary citizen of Alton is still growing and may reach the all time record height of nine feet before he attains his full stature

History and legend list other giants as having attained heights in excess of that of Robert Wadlow but none of these cases are supported by fact Closest authenticated rival to the distinction of being the tallest man in history is one Charles Byrne an Irishman who towered eight feet four inches and whose skeleton is now on exhibit in a London museum

He Plans to Take Up Law

Young Wadlow is at present a freshman at Shurtleff college in Alton and plans to become a lawyer The choice of a profession was partly dictated by a feeling that in this field his size would be less of a handicap and he less an object of curiosity

In talking with the Alton giant one is impressed by his retiring nature shyness and intense desire to be accepted as a normal person Despite the fortune he could probably make in the show world the youth is definitely opposed to the idea and points out that his size is no fault of his own and that it is no reason why he should go through life as a freak

There is no indication that hereditly played any part in the framing of Robert Wadlow Both his parents and his four brothers and sisters are of normal size and his ancestral line is apparently free from trace of any giants as far back as it is recorded

Six Feet Tall at Nine

Although Robert weighed only eight and one half pounds at birth he soon began to take on weight rapidly tipped the scales at 30 pounds when he was six months old and weighed as much as a seven year old boy on his first birthday

Each year he shot up at a prodigious rate and stood six feet tall and weighed 178 pounds when he was nine years old—considerably taller and heavier than his father His growth progressed at the rate of about three inches a year from then on and although he is now shooting up at more moderate speed he has not yet reached his full stature

Because of his size most of the sports and recreations open to a normal lad have not been his to enjoy In basketball he excels because of his height and amateur photography occupies much of his time

Reason for his abnormality is what medical science terms hypertrophy of the pituitary gland Located near the brain this endocrine body controls growth and when it fails to function properly results in abnormal development of an individual Because young Wadlow's condition started at birth his expansion has been such that he is fairly well proportioned despite his size

YOUTHS FACE QUIZ IN CHILD SLAYING

Girl's Battered Body Found in Mill Pond, "Gang of Young Hellions" Blamed

By The Associated Press

WINDSOR Vt March 6—Police Chief John Edmonds said today a gang of young hellions would be questioned for information in connection with the slaying of four years old Beverly Ann Page of Claremont N H whose battered body was found last night in a mill pond

At Claremont N H general hospital nurses shielded the child's mother who gave birth to a daughter only last Monday from news of her only other daughter's fate

Beverly Ann had been visiting her uncle and aunt Mr and Mrs Louis Thibault while her mother was in the hospital When she failed to come in from play for lunch yesterday Mrs Thibault notified the police

Three topics were discussed by Prof Ferguson as satisfactory program concentrate for poultry feeding factors to consider in mixing a ration and the need for regular feeding

Prof Ferguson gave the following mixture as a tested protein concentrate proved satisfactory at Ohio State university 70 per cent middlings 10 per cent each of bran oats and a alfa meal 3 per cent of meat scrap fish meal 1 per cent of dried milk one per cent each of salt and 300-um cod liver oil The average protein content of the mix ture is 0 per cent Usually 100 pounds of the substance can be used with 500 to 600 pounds of cereal grains he said

Following are the points listed by Prof Ferguson as those to be considered in judging a ration it should contain three or more cereals if yellow corn is not used other feeds rich in vitamin A should be included oats help growth and production of egg fiber content should be between three and one-half and seven per cent an adequate supply of vitamins is needed it should be palatable the price should not be excessive it should permit maximum use of home-grown grains it should produce no undesirable physiological effects it should not affect the eggs adversely and the quality and quantity of protein should be satisfactory

Despite the present high cost of feeds and the comparatively low price of eggs and poultry Prof Ferguson urged a full and regular feeding program If small amounts are fed the hens probably will use all the nutrients merely to maintain their bodies and no profit be made he said

5 TONS OF EARTH USED ON "TOBACCO ROAD" STAGE

Property Man of Road Show Coming to Marion Thursday Also Needs 35 Pounds of Turnips

Two of the strangest pieces of baggage ever carried by a theatrical troupe are included in the property list of the Tobacco Road company which will be at the Palace theater Thursday night for one performance of the sensational stage play

Whenever the company plays the property man brings into the theater from the train five tons of Georgia earth and 5 pounds of turnips The earth is a permanent fixture the turnips switch The earth remains on the stage but the turnips are eaten with such apparent avidity by the characters in the first act of the play that the property man puts in an order every week for 35 pounds of the vegetable

Groundcloths and tarpaulins were tried during the first rehearsals of Tobacco Road as the setting representing the yard of the Lester family facing on a tobacco road

Jack Kirkland author of the play and Sam H Grisman the producer decided after three experiments that realism was absolutely necessary and a hurry call was sent to Georgia to get the right kind of earth the first locations being ripped by fast freight

All the earth is mixed with the exception of the front [illegible] on which the play will be in danger of injury from rain or ankles or bits of glass After the earth has been sifted it is mixed with sand to give the proper consistency When a season the earth is changed It is carried from city to city in five huge wooden boxes

As for the turnips it is estimated that already 9 105 pounds of them have been bought during the presentation of the play for more than 900 times on Broadway and in 70 of the larger cities of the country

Marion will be one of the three small cities in the state to which the present company only one on tour will bring the play

Taylor Holmes is starred in the role of Jeeter Lester His associate artists include Florence Fernald Vinnie Phillips Pitt Herbert William Bishop Merval Hayden Sally Sanderson Dick Lee Lillian Ardell Walter Ayers and Harry Towns

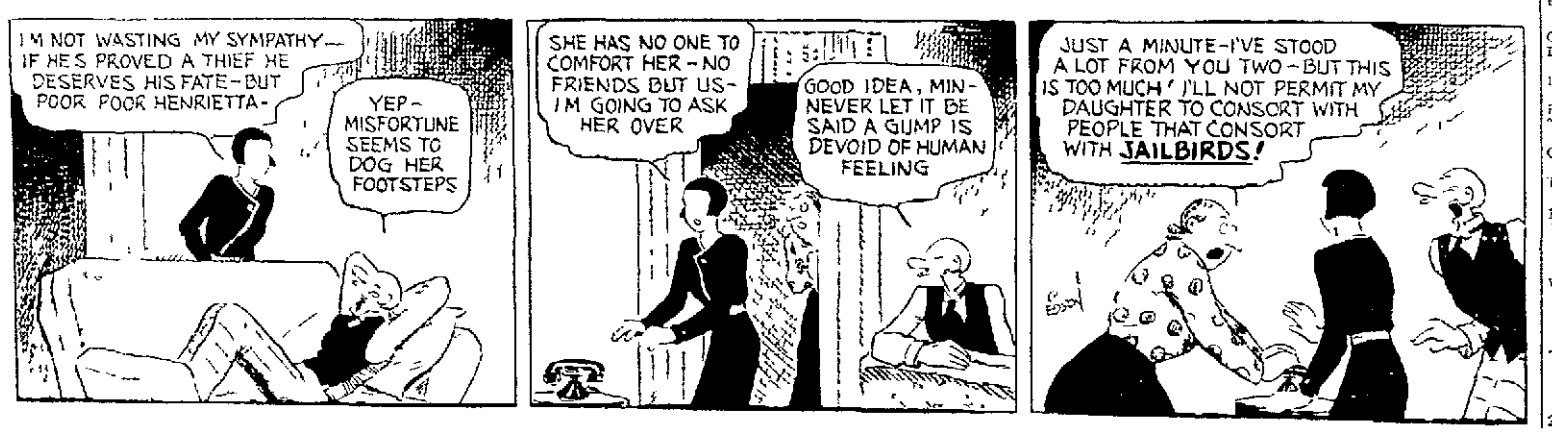
The Gumps — By Gus Edson



I'M NOT WASTING MY SYMPATHY— IF HE'S PROVED A THIEF HE DESERVES HIS FATE—BUT POOR POOR HENRIETTA—
YEP— MISFORTUNE SEEMS TO DOG HER FOOTSTEPS
SHE HAS NO ONE TO COMFORT HER—NO FRIENDS BUT US— I'M GOING TO ASK HER OVER
GOOD IDEA, MIN— NEVER LET IT BE SAID A GUMP IS DEVOID OF HUMAN FEELING
JUST A MINUTE—I'VE STOOD A LOT FROM YOU TWO—BUT THIS IS TOO MUCH! I'LL NOT PERMIT MY DAUGHTER TO CONSORT WITH PEOPLE THAT CONSORT WITH JAILBIRDS!
